RESTRICTION / REQUIREMENT FOR ELECTION

This application contains claims directed to more than one species of the generic invention. The species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species and corresponding unique special technical features are as follows:

- I. e.g. Fig 1 and 4, drawn to the radiation-emitting device is pattern.
- II. e.g. Fig 5, drawn to a radiation-emitting device is not patterned and there is a transparent layer between the first main face and the reflective layer.
- III. e.g. Fig 6, drawn to a radiation- emitting device is not patterned, but there are coating layers.
- IV. e.g. Fig.7, drawn to a radiation-emitting device is not patterned, but there is patterned conductive layer.

Currently, no claim is generic.

Restriction is being made under 35 U.S.C. §§ 121 and 372.

In accordance with 37 CFR § 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Restriction under unity of invention in national stage applications submitted under 35 U.S.C. § 371 is proper when two criteria are met: (1) different species of the invention are listed; and (2) lack of unity identifying the unique special technical features of each species is explained. See MPEP § 1893.03(d).

Application/Control Number: 10/572,655 Page 3

Art Unit: 2811

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features because each species includes different special technical features that define a different contribution which each of the inventions, considered as a whole, makes over the prior art. See MPEP § 1850.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of the species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species.

The election of a species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Application/Control Number: 10/572,655

Art Unit: 2811

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CATHY N. LAM whose telephone number is (571)270-5021. The examiner can normally be reached on M-F 7:30AM to 5PM.
